DETAILED ACTION

*Specification*

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Teraji et al (US 4,650,522 05-1987). Teraji discloses (Column 6, 48-55, EXAMPLE 3) production of a cement additive via the reaction of polyethyleneimine (PEI) and itaconic acid to give poly(2,3-dicarboxypropyl)polyethyleneimine having subunits as follows:

This compound meets all the instant claim limitations with a ratio of 2 carboxyl groups per side chain. Teraji discloses (Column 9, lines 41-59, EXAMPLE 26) reaction of PEI and acrylic acid followed by reaction with ethylene oxide to give a compound which the Examiner considers to meet the limitations of claims 7 and 8. Teraji further discloses (Column 4, line 55-column 5, line 43) cement compositions which comprise the compound set forth above which serves as the required dispersing agent as well as containing dispersing agents presumably present in the Portland cement employed. The composition of Teraji meets the description of a hydraulic material as set forth in Applicants' specification (Cf. page 1, lines 14-19 and Teraji, column 1, lines 4-15). Teraji therefore anticipates claims 1-12.

### *Conclusion*

3. Claims 1-12 are pending. Claims 1-12 are rejected.
